3. No changes in the FY 1963 forecast are proposed.

4. The following list of areas to be considered for the FY 1964 forecast has been prepared as a basis for discussion. The five to three ratio between maintenance and new work previously agreed upon by the Subcommittee has been retained. The selection of new areas is based on 1) the latest priority list available to us, 2) the status of completion of the remainder of the NIS Area for the area, and 3) an estimate of the relative significance of the mapping situation of the areas for which Chapters IX have not been completed or planned. The areas selected for maintenance work include those previously agreed by the Chapter IX Subcommittee to warrant special consideration in the FY 1964 forecast.
